NOTES

-Some Sony Ericsson phones do not display the time using the phone settings but always the corresponding GMT +0. (It can be corrected by setting the time on the phone so you do not use GMT+x or daylight savings time).

The mobiles that appear on this list can connect and function in hands-free mode, with different restrictions to operation depending on the model.

Warning: The use of earlier software versions can affect the operation of your mobile. It is recommended to always update your mobile to the latest software available from your mobile phone manufacturer. Ask for a current or later version.

Some Nokia mobiles can improve compatibility with the installation of a driver available from the Nokia website.

This list does not include possible changes made by the mobile phone manufacturers that can affect operation.

Some mobiles automatically use the phone's standard ring tone in hands-free mode (over the vehicle's speaker system). If the telephone is in silent mode, it is possible that the tones will not ring when using the hands-free function. It is recommended to always configure an audible ring tone.
